¹ Excludes countries that were part of the former U.S.S.R. See "Union of Soviet Socialist Republics (U.S.S.R.*)" in Glossary.

² Includes only countries that were part of the former U.S.S.R. See "Eurasia" and "Union of Soviet Socialist Republics (U.S.S.R.*)" in Glossary.

R=Revised. P=Preliminary.

Notes: • Data in this table do not include recent updates for the United States (see Table 1.3) or for other countries (see <http://tonto.eia.doe.gov/cfapps/ipdbproject/IEDIndex3.cfm>). • World primary energy consumption includes consumption of petroleum products (including natural gas plant liquids, and crude oil

burned as fuel), dry natural gas, and coal (including net imports of coal coke); and the consumption of net electricity generated from nuclear electric power, hydroelectric power, wood, waste, geothermal, solar, and wind. It also includes, for the United States, the consumption of renewable energy by the end-use sectors.

• Totals may not equal sum of components due to independent rounding.
