

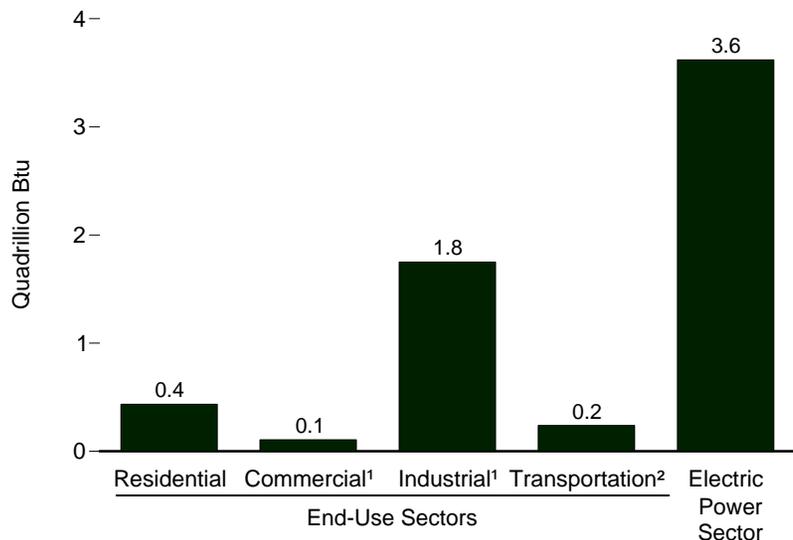

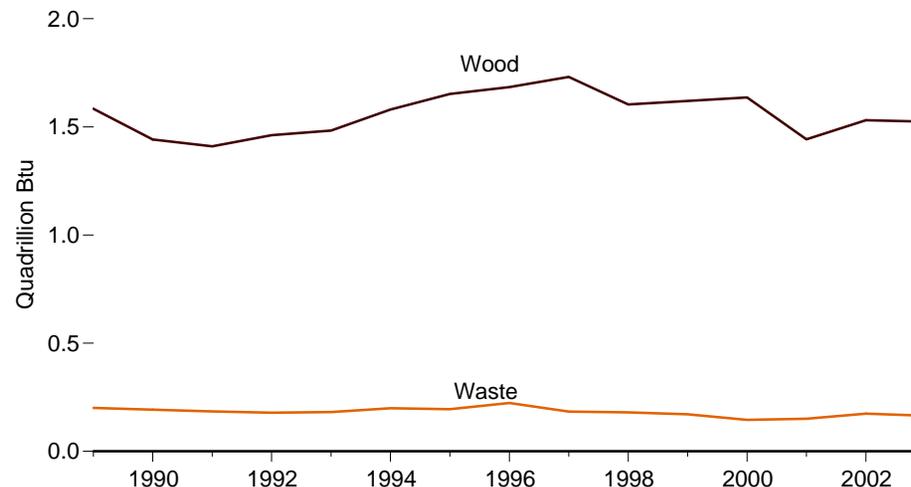

Figure 10.2a Renewable Energy Consumption: End-Use Sectors

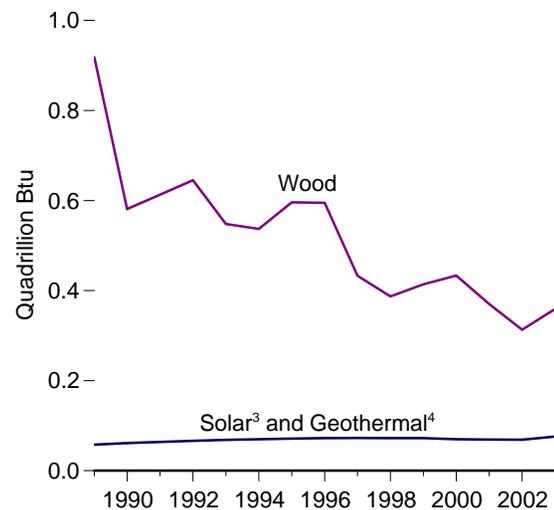

End-Use Sectors and Electric Power Sector, 2003

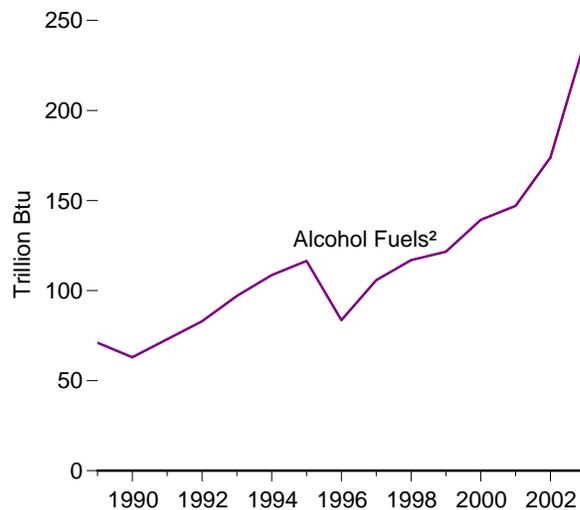

Industrial¹ Sector, Major Sources, 1989-2003

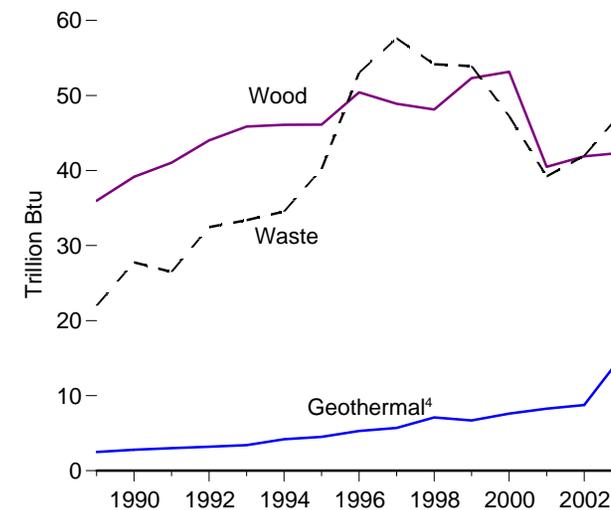

Residential Sector, 1989-2003

Transportation Sector, 1989-2003

Commercial¹ Sector, Major Sources, 1989-2003

¹ Includes fuel used at combined-heat-and-power plants and a small number of electricity-only plants.

² Ethanol blended into motor gasoline.

³ Solar thermal direct use energy and photovoltaic electricity generation. Includes small amounts of commercial sector use.

⁴ Geothermal heat pump and direct use energy.

Notes: • See related Figure 10.2b on the electric power sector. • Because vertical scales differ, graphs should not be compared.

Sources: Tables 10.2a and 10.2b.
