2008 <sup>P</sup>	1,799	41	8,149	8,586	18,575	19	5	2,032	2,056	20,630	3,351	7,229	31,210

<sup>1</sup> See "Primary Energy Consumption" in Glossary.

<sup>2</sup> Most data are estimates. See Table 10.2b for notes on series components and estimation.

<sup>3</sup> Natural gas only; excludes the estimated portion of supplemental gaseous fuels. See Note 1, "Supplemental Gaseous Fuels," at end of Section 6.

<sup>4</sup> Does not include the fuel ethanol portion of motor gasoline—fuel ethanol is included in "Biomass."

<sup>5</sup> Conventional hydroelectric power.

<sup>6</sup> Electricity retail sales to ultimate customers reported by electric utilities and, beginning in 1996, other energy service providers.

<sup>7</sup> Total losses are calculated as the primary energy consumed by the electric power sector minus the energy content of electricity retail sales. Total losses are allocated to the end-use sectors in proportion to

each sector's share of total electricity retail sales. See Note, "Electrical System Energy Losses," at end of section.

R=Revised. P=Preliminary. NA=Not available. (s)=Less than +0.5 trillion Btu and greater than -0.5 trillion Btu.

Notes: • The industrial sector includes industrial combined-heat-and-power (CHP) and industrial electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 8. • Totals may not equal sum of components due to independent rounding.

Web Page: For all data beginning in 1949, see <http://www.eia.doe.gov/emeu/aer/consump.html>.
