

State Energy Data System CSV File Documentation

Energy Source Tables

Last Update: 2/19/2008 (PED)

These comma-separated value (CSV) files contain data included in the State Energy Data System (SEDS) consumption, price, and expenditure tables (formerly the "State Energy Data Report, Consumption Estimates" and the "State Energy Price and Expenditure Report") located on the SEDS web page at http://www.eia.doe.gov/emeu/states/seds_updates.html.

There is a CSV file for the most recent year's data for each energy source as shown in the HTML and PDF data tables. In some cases there is one data file for two tables. In addition, there are CSV files that contain data for all States and years.

The first record in each file contains the column headings. The first data field is the State code (2 characters), followed by the data identifier (5 characters), and then the data arrayed by years. Estimates for consumption are available as from 1960; estimates for prices and expenditures are available as from 1970. All fields are separated by commas. All fields are enclosed in quotes, which mean some systems will read numeric values as alphanumeric unless they are converted. Detailed descriptions of the State codes, data identifiers, and units are listed in the latter part of this documentation.

While the data shown in the PDF and HTML tables are rounded, the data in these CSV files are in the greatest precision contained in the SEDS database and expressed with five decimal places with explicit decimal points included in the numeric fields. However, the precision does not necessarily reflect the statistical accuracy of the numbers. Users should see the sources cited in the SEDS Consumption Technical Notes as well as the SEDS Price and Expenditure Technical Notes for a discussion of estimation methodologies for specific data series.

The data files contain additional data series not shown in the report tables that have frequently been requested by customers. These additional data include the individual "Other Petroleum Products" used in the industrial sector, the breakout of natural gas used as lease and plant fuel, and the breakout of types of jet fuel in the transportation sector.

To fully understand and utilize the data files, customers should read the documentation in the Technical Notes available at: http://www.eia.doe.gov/emeu/states/seds_updates_tech_notes.html.

Copies of the reports may be obtained from:

National Energy Information Center, EI-30
Energy Information Administration
Forrestal Building
Room 1E-238
Washington, D.C. 20585
202-586-8800

The two-letter U.S. State Codes are as follows:

U.S. Postal State Codes							
Code	Name	Code	Name	Code	Name	Code	Name
AK	Alaska	ID	Idaho	MT	Montana	RI	Rhode
AL	Alabama	IL	Illinois	NE	Nebraska	SC	South Carolina
AR	Arkansas	IN	Indiana	NC	North Carolina	SD	South Dakota
AZ	Arizona	KS	Kansas	ND	North Dakota	TN	Tennessee
CA	California	KY	Kentucky	NH	New Hampshire	TX	Texas
CO	Colorado	LA	Louisiana	NJ	New Jersey	UT	Utah
CT	Connecticut	MA	Massachusetts	NM	New Mexico	VA	Virginia
DC	District of Columbia	MD	Maryland	NV	Nevada	VT	Vermont
DE	Delaware	ME	Maine	NY	New York	WA	Washington
FL	Florida	MI	Michigan	OH	Ohio	WI	Wisconsin
GA	Georgia	MN	Minnesota	OK	Oklahoma	WV	West Virginia
HI	Hawaii	MO	Missouri	OR	Oregon	WY	Wyoming
IA	Iowa	MS	Mississippi	PA	Pennsylvania	US	United States

The 5-letter data identifier is a SEDS variable name defined as follows:

Data Identification Codes	
Characters	Identity
1 and 2	Represent an Energy Source
3 and 4	Represent an Energy End-Use Sector or any Energy Activity
5	Represents a Type of Data

Energy Source (Characters 1 and 2)			
Code	Name	Code	Name
AR	Asphalt and road oil	NG	Natural gas (including supplemental gaseous fuels)
AV	Aviation gasoline	NN	Natural gas (excluding supplemental gaseous fuels)
CC	Coal coke	NU	Nuclear electric power
CL	Coal	MG	Motor gasoline
DF	Distillate fuel oil	PA	All petroleum products
EN	Fuel Ethanol	PE	Primary energy, equal to TE in the electric power sector
ES	Electricity sales	PO	Other petroleum products, subtotal
GE	Geothermal energy	RF	Residual fuel oil
HY	Hydroelectric power	SO	Solar thermal and photovoltaic energy
JF	Jet fuel	TE	Total energy
KS	Kerosene	TN	Total net energy
LG	Liquefied petroleum gases	WD	Wood
LO	Electrical system energy losses	WW	Wood and waste
LU	Lubricants	WY	Wind

Energy End-Use Sectors and Energy Activities (Characters 3 and 4)	
Code	Name
AC	Transportation sector
CC	Commercial sector
EI	Electric power sector, fuel consumption
EG	Electric power sector, net generation
ET	Total net generation
EX	Exports
HC	Residential and commercial sectors combined
IC	Industrial sector
IM	Imports
KC	Coke plants (coal consumption only)
LP	Lease and plant fuel (natural gas consumption only)
OC	Industrial sector, other than coke plants (coal consumption only)
PZ	Pipeline fuel (natural gas consumption only)
RC	Residential sector
TC	Total of all sectors
VH	Vehicle fuel (natural gas consumption only)
XC	All sectors, other than coal consumed in coke plants

Types (Character 5)	
Code	Name
B	Data in billion British thermal units (Btu)
P	Data in physical units: Petroleum – thousand barrels Natural Gas – million cubic feet Coal – thousand short tons Electricity – million kilowatthours Population – thousand people
D	Price in nominal dollars per million Btu
V	Expenditures in million nominal dollars

State-level factors used to convert data from physical units to Btu:

SEDS Variable Name	Description	Unit
CLACK	Coal consumed by the transportation sector	Million Btu per short ton
CLEIK	Coal consumed by the electric power sector	Million Btu per short ton
CLHCK	Coal consumed by the residential and commercial sector	Million Btu per short ton
CLKCK	Coal consumed at coke plants	Million Btu per short ton
CLOCK	Coal consumed by other industrial users	Million Btu per short ton
NGEIK	Natural gas consumed by the electric power sector	Thousand Btu per cubic foot
NGTCK	Natural gas consumed by all sectors	Thousand Btu per cubic foot
NGTXK	Natural gas consumed by all sectors other than the electric power sector	Thousand Btu per cubic foot

The following section lists the SEDS variables in the order they appear in the Energy Source tables. Each table column contains one variable.

Table F1: Motor Gasoline Consumption, Price, and Expenditure Estimates by Sector

MGCCP	MGICP	MGACP	MGTCP	MGCCB	MGICB	MGACB
MGTCB	MGTCB	MGCCV	MGICV	MGACV	MGTCV	

Table F2: Jet Fuel Consumption, Price, and Expenditure Estimates by Sector
