

**Table ES1. Summary of Estimated U.S. Emissions of Greenhouse Gases, 1990 and 1995-2003**  
(Million Metric Tons of Gas)

Gas	1990	1995	1996	1997	1998	1999	2000	2001	2002	P2003
Carbon Dioxide . . . . .	4,990.1	5,306.7	5,495.5	5,558.1	5,590.7	5,671.6	5,844.8	5,777.0	5,824.8	5,870.2
Methane . . . . .	30.8	29.6	28.3	28.2	27.2	26.6	26.7	26.0	26.1	26.2
Nitrous Oxide . . . . .	1.1	1.2	1.2	1.1	1.1	1.1	1.1	1.1	1.1	1.1
HFCs, PFCs, and SF <sub>6</sub> . .	M	M	M	M	M	M	M	M	M	M

M = mixture of gases. These gases cannot be summed in native units. See Table ES2 for estimated totals in carbon dioxide equivalent.  
P = preliminary data.

Note: Data in this table are revised from the data contained in the previous EIA report, *Emissions of Greenhouse Gases in the United States 2002*, DOE/EIA-0573(2002) (Washington, DC, October 2003).
