

Errata for International Energy Outlook 1998

The following errors in the International Energy Outlook 1998 are noted:

1. Under the Summary paragraph of The World Oil Market section, the second sentence has been corrected to read:

"For example, proposed Latin American/Caribbean standards for diesel fuel require a maximum sulfur content of 5,000 ppm in 2001, whereas Finland, Sweden, and the State of California already require diesel fuel containing less than 500 ppm." not 50 ppm.
