

**Table 20. Weather Summary, Selected U.S. Cities**  
 (Population Weighted Cooling Degree-Days<sup>1</sup>)

Weather data reported in the *Weekly Petroleum Status Report* are taken directly from a computerized system implemented by the National Oceanic and Atmospheric Administration, Department of Commerce. The National Oceanic and Atmospheric Administration (NOAA)/NWS, as a U.S. Government Agency, does not endorse any consumer information services.

The weather for the Nation, as measured by population-weighted cooling degree-days from July 1, 2001, through July 6, 2002, has been 10 percent warmer than last year and 22 percent warmer than normal.

Location	Current 01/01/02 thru 07/06/02	Previous 01/01/01 thru 07/06/01	Normal 01/01 thru 07/06	Percent Change	
				Current vs. Previous	Current vs. Normal
U.S. Total, Population-Weighted	510	465	419	10	22

<sup>1</sup>See Glossary.

\*\*\* = Normal cooling degree-days or less, or ratio incalculable.

Note:• The total cooling degree-days for the previous cooling season (January 1, 2001 - December 31, 2001) was 1,275 and the normal is 1,192. A new method for calculating heating/cooling degree days was implemented by the Climate Analysis Center in October 1993, with further refinements implemented in November 1993. The routines incorporate 1961-1990 normals supplied by the National Climatic Data Center, and 1990 census data for calculation of population weighted degree days.
