¹ Includes energy consumption for refrigeration and lighting.

Includes a small amount of fuel oil and kerosene.
 Averages are for those households using each of the fuels for appliances.

a The row factor in this section is underestimated because it contains no applications.

NE = RSE row factor not estimated because RSE's for all statistics in this row are between 0.0 and 1.0 percent.

Q = Data withheld either because the Relative Standard Error (RSE) was greater than 50 percent or fewer than 10 households were sampled.

Notes: • To obtain the RSE percentage for any table cell, multiply the corresponding column and row factors. • Because of rounding, data may not sum to totals.
