West Virginia	39	27	1,779	1,845	0.1	0.1	6.2	6.4
Wisconsin	131	113	6,280	6,524	0.5	0.4	21.9	22.7
Wyoming	35	24	651	710	0.1	0.1	2.3	2.5
United States	9,077	5,685	319,130	333,891	31.6	19.8	1,111.3	1,162.7

^a In estimating the Btu consumption of fuel ethanol, the Btu content of denaturant (petroleum products added to ethanol to make it unsuitable for human consumption) is removed. This identifies the renewable portion of fuel ethanol and avoids double-counting when summing data across energy sources.

Where shown, (s) = Physical unit value less than 0.5 or Btu value less than 0.05.

Notes: • Fuel ethanol blended into motor gasoline, which is accounted for under motor gasoline, is

shown separately in this table to display the use of renewable energy. Because of differences in data sources and estimation methods, the ratio of fuel ethanol consumption and motor gasoline consumption should not be interpreted as the average ethanol blend rate. • Totals may not equal sum of components due to independent rounding.
